PRODUCT OVERVIEW

The PHYSIOMODALITIES™ 3D-Spine-Pro is an advanced robotic spinal decompression system engineered for precise, comfortable and effective cervical & lumbar therapy.

It combines intelligent robotic technology with multi-directional movements to deliver superior clinical outcomes and accelerated patient recovery.

- 1 Touchscreen Control Panel
- 2 Head Section
- 3 Upper Body Bolsters
- 4 Enlarged Lumbar Section
- 5 Pelvic Section
- 6 Leg Support Section
- 7 Diamond Shape Support Column
- 8 Robotic Motion System
- 9 Heavy Duty Steel Base
- 10 Leg Straps
- 11 Height Adjustment System

KEY HIGHLIGHTS

MULTI-DIRECTIONAL MOVEMENTS

Flexion, Extension, Lateral Bending, Axial Rotation & Decompression

INTELLIGENT ROBOTIC CONTROL

Precise, smooth & consistent therapy for better outcomes

ENLARGED LUMBAR PLATFORM

Provides superior support & comfort for effective lumbar decompression

SAFE & STABLE STRUCTURE

Diamond shape support column ensures maximum stability & safety

TOUCHSCREEN INTERFACE

Intuitive control with customizable protocols & real-time monitoring

4th floor, WZ 3428,
Near Raja Park Road, Rani Bagh,
New Delhi, Delhi 110034

HOW IT WORKS

The PHYSIOMODALITIES™ 3D-Spine-Pro uses advanced robotic technology to perform controlled spinal movements combined with decompression therapy.

These precise motions gently create space between the vertebrae, reduce pressure on discs and nerves, and promote natural healing.

Non-Surgical. Drug-Free.
Precision Therapy.
Better Recovery.

SPINAL DECOMPRESSION THE SCIENCE BEHIND HEALING

During decompression, gentle traction forces separate the vertebrae, creating negative pressure inside the intervertebral discs.

1. COMPRESSED DISC

Compressed discs cause pain, inflammation and nerve irritation.

2. DECOMPRESSION STARTS

Controlled traction gently stretches the spine and creates space.

3. PRESSURE REDUCES

Intradisc pressure reduces and nerve compression is relieved.

4. NUTRIENT FLOW IMPROVES

Oxygen, nutrients and fluid move back into the disc naturally.

5. HEALING & RECOVERY

Disc health improves, pain reduces and mobility is restored.

THERAPEUTIC BENEFITS

Relieves Chronic
Lower Back Pain

Reduces Disc Pressure
& Nerve Compression

Improves Spinal
Alignment

Enhances Mobility
& Flexibility

Promotes Natural
Healing

Non-Invasive
& Drug-Free

Improves Blood
Circulation

Reduces Muscle
Spasm & Stiffness

Supports Posture
Correction

Speeds Up Recovery
& Rehabilitation

INTELLIGENT CONTROL MAXIMUM COMFORT

- ✓ Intuitive Touchscreen Interface
- ✓ Pre-set & Custom Protocols
- ✓ Real-time Parameter Adjustment
- ✓ Treatment Progress Monitoring
- ✓ Patient Profile Management
- ✓ Safe, Smooth & Precise Operation

Intelligent Technology.
Trusted Performance.

BUILT FOR EXCELLENCE

The PHYSIOMODALITIES™ 3D-Spine-Pro is engineered with premium materials, intelligent robotics and advanced structural design to deliver unmatched stability, performance and patient safety.

MULTI-DIRECTIONAL MOVEMENTS COMPLETE SPINAL CARE

The 3D-Spine-Pro performs five intelligent robotic movements that work together to restore spinal health, mobility and function.

FLEXION & EXTENSION

Improves spinal mobility and relieves muscle tightness.

AXIAL ROTATION

Enhances joint mobility and restores spinal flexibility.

LATERAL BENDING

Relieves muscle imbalance and improves spinal alignment.

AUTOMATIC DECOMPRESSION

Gently stretches the spine and reduces disc pressure.

CERVICAL TRACTION

Relieves neck pain and nerve compression with controlled traction.

INTELLIGENT TOUCH. COMPLETE CONTROL.

The intuitive touchscreen control panel puts complete treatment control at your fingertips. Designed for ease of use, it allows clinicians to set, monitor and customize every parameter for precise and effective therapy.

PRESET PROGRAMS

Multiple pre-set programs for quick and effective treatment.

ADJUSTABLE PARAMETERS

Control force, speed, time and ranges with precision.

PATIENT PROFILES

Save and manage individual patient treatment records.

REAL-TIME MONITORING

Live feedback of force, time, cycles and movement status.

SAFETY CONTROL

Emergency stop & safety lock for maximum patient protection.

EASY NAVIGATION

User-friendly interface for smooth and efficient operation.

SMART TECHNOLOGY
FOR BETTER OUTCOMES

ACCURATE SETTINGS
PRECISE RESULTS

DESIGNED FOR CLINICIANS
FOCUSED ON PATIENTS

SAFE. RELIABLE.
EFFECTIVE.

PRESET THERAPY PROGRAMS CUSTOMIZED CARE FOR EVERY PATIENT

The 3D-Spine-Pro comes with a wide range of pre-set therapy protocols designed for different conditions and patient needs. Each program is engineered to deliver safe, effective and consistent results.

PAIN RELIEF PROGRAMS

- Chronic Lower Back Pain
- Neck Pain & Stiffness
- Muscle Spasm Relief

01

DISC & NERVE CONDITION PROGRAMS

- Disc Herniation
- Bulging Disc
- Sciatica & Radiculopathy

02

SPONDYLOSIS PROGRAMS

- Lumbar Spondylosis
- Cervical Spondylosis
- Facet Joint Dysfunction

03

POSTURE & ALIGNMENT PROGRAMS

- Postural Correction
- Spinal Alignment Therapy
- Muscle Balance Therapy

04

MOBILITY ENHANCEMENT PROGRAMS

- Flexibility Improvement
- Range of Motion Enhancement
- Joint Mobilization

05

REHABILITATION PROGRAMS

- Post-Surgical Rehabilitation
- Injury Recovery
- Posture Rehabilitation

06

SPORTS RECOVERY PROGRAMS

- Sports Injury Recovery
- Performance Enhancement
- Muscle Recovery

07

WORK & LIFESTYLE PROGRAMS

- Desk Job Back Pain Relief
- Sedentary Lifestyle Therapy
- Ergonomic Spinal Care

08

WELLNESS PROGRAMS

- Stress Relief & Relaxation
- Spinal Decompression Wellness
- Overall Spine Health

09

CUSTOM PROGRAMS

- Create Custom Protocols
- Save & Repeat
- Personalized Patient Care

PRECISION ENGINEERING. PREMIUM PERFORMANCE.

Built with high-grade materials and advanced robotic technology, the 3D-Spine-Pro delivers unmatched stability, durability and clinical results.

RIGID & STABLE STRUCTURE

Diamond shape central support column ensures superior stability and safety.

PREMIUM MATERIALS

High quality steel frame with powder coated finish for rust resistance and long life.

HIGH LOAD CAPACITY

Engineered to safely support patients up to 150 kg with complete stability.

COMFORT & HYGIENE

Medical grade upholstery for maximum comfort and easy maintenance.

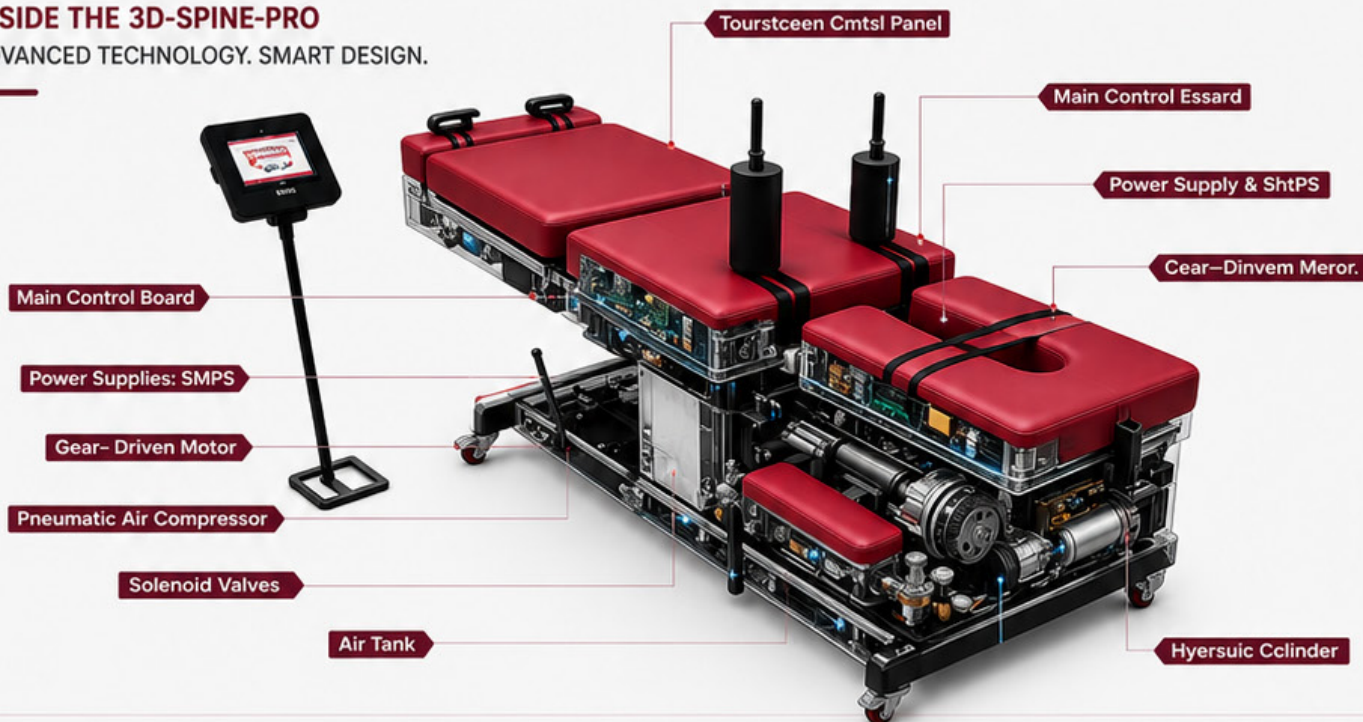

BUILT TO LAST

Heavy duty components ensure minimal maintenance and long service life.

INSIDE THE 3D-SPINE-PRO

ADVANCED TECHNOLOGY. SMART DESIGN.

ENHANCED SAFETY

Advanced protection systems for maximum patient safety.

PRECISION ACCURACY

Intelligent robotic control for precise and consistent therapy.

SMOOTH PERFORMANCE

High quality components ensure smooth and quiet operation.

BUILT FOR DURABILITY

Engineered for long term reliability and continuous clinical use.

TRUSTED BY PROFESSIONALS

Designed for physiotherapists and spine care specialists worldwide.

HOW 3D-SPINE-PRO WORKS SMART TECHNOLOGY. LASTING RELIEF.

The 3D-Spine-Pro uses advanced robotic technology to gently decompress the spine, relieve pressure on discs and nerves, and promote natural healing — all in a safe, comfortable and non-invasive way.

THE WORKING PRINCIPLE

- 1 ROBOTIC MOVEMENTS**
The table performs 3D movements (flexion, extension, lateral bending, rotation & traction).
- 2 SPINAL DECOMPRESSION**
These movements create a gentle pumping action that increases space between spinal discs.
- 3 PRESSURE REDUCTION**
Reduces pressure on compressed discs and pinched nerves.
- 4 NUTRITION & HEALING**
Improved circulation allows oxygen and nutrients to flow into discs, promoting natural healing.
- 5 PAIN RELIEF & MOBILITY**
Helps relieve pain, reduce inflammation and restore natural spinal mobility.

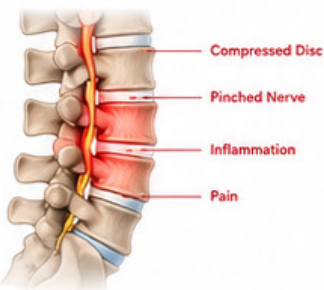

STEP-BY-STEP: HOW A SESSION WORKS

- 1 PATIENT POSITIONING**
Patient lies comfortably on the table and is secured with safety straps.
- 2 PROGRAM SELECTION**
Therapist selects the appropriate program based on the condition.
- 3 3D ROBOTIC MOVEMENTS**
The table performs automated 3D movements with controlled traction and adjustments.
- 4 DECOMPRESSION & RELIEF**
Spinal discs are gently stretched, pressure is reduced and nerves are relieved.
- 5 RECOVERY & HEALING**
Improved blood flow and nutrient supply support natural disc recovery.
- 6 LONG TERM BENEFITS**
Pain reduces, mobility improves and patient returns to an active life.

BEFORE & AFTER: THE DIFFERENCE

BEFORE TREATMENT

Compressed discs, pinched nerves and reduced mobility cause pain, stiffness and discomfort.

AFTER TREATMENT

Decompressed discs, reduced pressure and improved alignment bring relief, healing and mobility.

CONDITIONS IT CAN HELP

- Herniated / Bulging Discs**
Relieves pressure on herniated or bulging discs and reduces pain.
- Facet Joint Syndrome**
Reduces stress on facet joints and improves mobility.
- Sciatica & Nerve Pain**
Helps relieve pressure on the sciatic nerve and reduces radiating leg pain.
- Spinal Stenosis**
Creates more space in the spinal canal and reduces nerve compression.
- Chronic Lower Back Pain**
Reduces muscle tension and improves spinal alignment.
- Neck Pain & Cervical Issues**
Relieves pressure in the cervical spine and improves flexibility.
- Degenerative Disc Disease**
Slows down degeneration and promotes disc nutrition.
- Post-Surgery / Post-Injury Rehab**
Supports recovery, strengthens spine and prevents relapse.

- NON-INVASIVE**
Drug-free & surgery-free natural therapy.
- SAFE & COMFORTABLE**
Secure design with premium upholstery & safety straps.
- CLINICALLY EFFECTIVE**
Trusted by physiotherapists and spine care specialists worldwide.
- SMART & AUTOMATED**
Programmed therapy with precise 3D robotic movements.
- SUITABLE FOR ALL AGES**
Ideal for patients of all age groups (under therapist supervision).

BUILT FOR RESULTS. DESIGNED FOR PROFESSIONALS.

Engineered with advanced robotics, intelligent controls and premium materials, 3D-Spine-Pro delivers precise spinal decompression for better clinical outcomes and patient satisfaction.

Precision Mechanics

Smart Robotics

Patient Comfort

Therapist Friendly

Reliable Performance

Future Ready

PATIENT COMFORT & SAFETY

- Wide & Comfortable Table Surface
- Premium PU Leather Easy to Clean
- Safety Straps for Secure Therapy
- Smooth Movement for Maximum Comfort

CUSTOMIZABLE THERAPY PROGRAMS

Pre-set programs with adjustable parameters to match every patient's condition and therapy goals.

- Pre-set Therapy Programs
- Adjustable Traction Force
- Adjustable Hold Time
- Adjustable Rest Time
- Real-time Feedback
- Save & Customize Programs

3D ROBOTIC MOVEMENTS

Multi-directional movements for complete decompression & pain relief.

FULLY ADJUSTABLE FOR TARGETED THERAPY

SMART CONTROL. INTELLIGENT TECHNOLOGY.

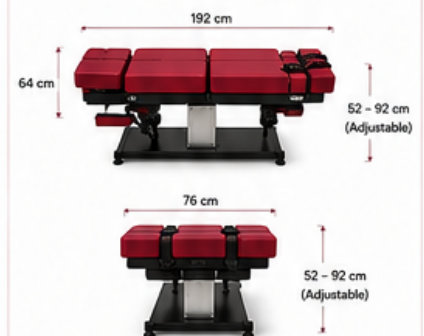

- 7" HIGH RESOLUTION TOUCHSCREEN**
Easy to use interface with clear visualization.
- REAL-TIME THERAPY FEEDBACK**
Monitor force, time, cycles & progress live.
- PRE-SET & CUSTOM PROGRAMS**
Built-in programs + custom therapy option.
- PATIENT DATA MANAGEMENT**
Save patient history & track progress.
- THERAPIST LOCK MODE**
Secure settings to ensure safe operation.

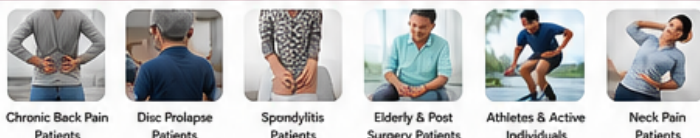

TECHNICAL SPECIFICATIONS

Model Name	3D-SPINE-PRO
Technology	Robotic Spinal Decompression
Movements	3D (Flexion, Extension, Lateral Bending, Rotation & Traction)
Control Panel	7" Touchscreen
Programs	Pre-set + Custom Programs
Load Capacity	Up to 150 Kg
Height Adjustment	Electric
Power Supply	AC 220V, 50Hz
Motor System	High Performance German Motors
Safety	Emergency Stop, Safety Straps
Mobility	Lockable Wheels
Upholstery	Premium PU Leather

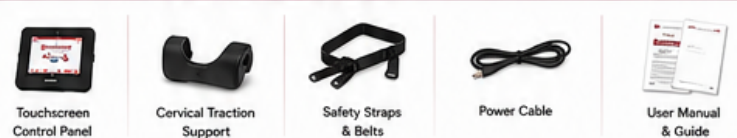

TABLE DIMENSIONS

SMART INVESTMENT. BETTER OUTCOMES. GREATER PATIENT TRUST.

3D-Spine-Pro is more than a table – it's a complete solution for advanced spine care. Enhance your clinic's capabilities, improve patient outcomes and grow your practice with confidence.

WHY CLINICS CHOOSE 3D-SPINE-PRO?

Increase Patient Satisfaction

Advanced technology ensures better comfort and outcomes.

Faster Recovery for Patients

Helps patients return to their daily life quickly.

More Patients, More Growth

Treat more patients effectively and grow your practice.

Professional Image Boost

State-of-the-art equipment builds trust & credibility.

Non-Invasive & Safe

Drug-free, surgery-free therapy for maximum patient trust.

Long-Term Durability

Built with premium materials for years of reliable service.

AFTER-SALES SUPPORT YOU CAN COUNT ON
